Fund Manager's Comments

November 2009 was a lacklustre month for local bourses amidst abnormally low volumes. Average traded volume during the month was 127 mn shares against last five-year average of 240 mn shares. Market for most part was directionless on account of lack of liquidity, political stalemate over NRO, confusion over Monetary Policy before its announcement and rising security concerns in the Northern Areas. Your fund returned 0.78% during the month under review against 0.51% appreciation in KSE-100, its benchmark. On since inception basis ABL-SF is showing a return of 29.29% against 28.52% return of its benchmark, which reflects an outperformance by 77 basis points

Your fund continues to stay significantly invested into equities in spite of the lacklustre activity witnessed at local bourses. These are one of those rare times when top-tier stocks continue to trade at very attractive values. Sitting on cash is not the wisest policy at current index levels under present circumstances. Disturbances, most notably the security situation in North and political woes, seem to be priced-in as evident from the resilience shown by the market over past two months. Inaction, more often than not, beats action in the market and we reiterate our position that it is the holding of key blue-chip stocks that will bear fruit for investors in any bull rally at KSE from hereon.

Basic Fund Information

Fund Type	Open-end
Category	Equity Scheme
Launch Date	June 28 th , 2009
Net Assets (Rs.)	392,356,041 as at November 30, 2009
NAV Per Unit (Rs.)	12.9290 as at November 30, 2009
Benchmark	KSE-100 Index

Performance

Fund Manager's Comments

ABL-IF yielded a monthly annualized return of 11.62%, 58 bps higher than its preceding month's return. In line with our expectations a cut in the Discount Rate of 50 bps was announced by the State Bank of Pakistan (SBP) in its Monetary Policy Statement (MPS) on November 24, 2009. This led to an increase in T-Bill prices, consequently benefiting ABL-IF's T-Bill portfolio which presently stands at 15.85% of the fund size. During the month, TDR placements increased from 31.84% to 43.23% of the fund size, due to attractive rates being offered by banks and DFIs' on account of year end crossing. Irrespective of the persistent liquidity shortage in the market and outflows on account of Eid-ul-Azha, ABL-IF's fund size grew by 4.86% over the period under review to Rs.9,206 mn.

Fiscal challenges persist due to uncertainties pertaining to foreign non-IMF financial inflows which may impede reduction in the current account deficit. Although worker's remittances have been cushioning the current account deficit, however costs associated with oil import, commodity procurement and defence expenditure are a cause of concern. Inflation has eased on a YoY basis, but with the high base effect diminished and rise in commodity and oil prices, inflation is likely to increase. On the positive front though, Large Scale Manufacturing (LSM) has shown improvement coupled with an increase in private sector credit off take. Thus, a slight cut in the discount rate by 50 bps to 12.50% seems justified.

ABL-IF is set to yield good returns in lieu of the recent cut in Discount Rate as it has locked in placements at high rates. Furthermore, with nascent government borrowing, T-Bills yields are expected to remain competitive. Considering the uncertainties surrounding both the global and local markets, ABL-IF intends to retain its conservative stance by investing with good rated counters and in short term sovereign debt instruments.

Basic Fund Information

Fund Type	Open-end
Category	Income Scheme (Not categorized as per SECP's categorization)
