FUND MANAGER'S REPORT, April 2025

ECONOMY AND CAPITAL MARKETS UPDATE

Economic Review

Pakistan's inflation rate dropped to a record low of 0.28% YoY in April 2025, down from 0.69% in March 2025 and 17.34% in April 2024 — one of the lowest monthly readings in six decades — bringing the average inflation for 10MFY25 to 4.73%, a dramatic improvement from 25.97% over the same period last year. Month-on-month, National CPI fell by 0.84%, with Urban CPI down 0.70% and Rural CPI contracting by 1.05%. This was largely driven by declines in food prices — notably perishable food items, which dropped 2.7% MoM and 26.7% YoY — as well as housing, water, electricity, gas, and fuels, which fell 2.3% MoM. On the external front, Pakistan's trade deficit widened by 55.2%, reflecting domestic consumption of petroleum products and rising automobile sales. Exports totaled \$2.14 billion, while imports surged to \$5.53 billion. Cumulatively, exports for 10MFY25 reached \$26.86 billion, with imports at \$48.21 billion, yielding a cumulative trade deficit of \$21.35 billion. Despite this, the external account strengthened significantly, lifted by record worker remittances of \$4.06 billion in March — the highest monthly inflow on record — largely fueled by Eid-related transfers and increased use of formal banking channels, as the interbank rate now closely matches open market rates, minimizing parallel market incentives. Consequently, the current account posted a robust \$1.2 billion surplus in March. As of April 30, 2025, Pakistan's foreign exchange reserves stood at \$15.01 billion, comprising \$10.64 billion with the State Bank of Pakistan (SBP) and \$4.38 billion with commercial banks. On the fiscal side, the Federal Board of Revenue (FBR) collected Rs 846 billion in April 2025, falling short of the Rs963 billion monthly target by Rs117 billion. However, cumulative collections for FY25 reached Rs9.299 trillion against a target of Rs10.130 trillion, marking a 27% increase over the Rs7.350 trillion collected in the same period last year. The exchange rate closed at 280.76/281.19 PKR per USD. With the US dollar depreciating against major global currencies (AUD, CHF, GBP, EUR, CAD), the rupee also saw corresponding slippages, reflecting its close peg to a weakening dollar. Looking ahead, markets await the IMF Executive Board meeting on May 9, where Pakistan's Extended Fund Facility (EFF) tranche and climate financing are on the agenda. Despite external headwinds, including US-China tariffs and heightened regional tensions with India, Pakistan's strong remittance flows and a solid current account surplus provide cautious optimism as the country works to consolidate its economic recovery.

Money Market Review

Headline inflation decelerated sharply in April 2025, with the Consumer Price Index (CPI) registering at 0.28% YoY. This marks a notable decline from 0.69% in March 2025 and a steep drop from 17.34% a year earlier, reflecting the combined impact of domestic policy measures, improved supply dynamics, and favorable global trends. Core inflation rose marginally on a monthly basis—1.3% in urban and 0.9% in rural areas—while annual urban and rural core inflation continued to ease to 7.4% and 9.0%, respectively. On the external front, SBP's foreign exchange reserves currently stands at \$15.01 billion, comprising \$10.64 billion with the State Bank of Pakistan (SBP) and \$4.38 billion with commercial banks. The current account balance showed further improvement, posting a surplus of USD \$1.2 billion in March, up from USD 97 million deficit in the previous month. Cumulatively, 9MFY25 registered a surplus of USD 1.86 billion, supported by strong remittance inflows and export performance. Worker remittances reached \$4.06 billion in March 2025, with a nine-month total of \$28.1 billion, reflecting a 33% year-on-year increase, fueled by stable exchange rates and enhanced formal channels. Exports in March rose 8.6% YoY to \$3.5 billion, while the nine-month total reached \$30.9 billion, up 8.1% from \$28.6 billion last year, led by textiles but hampered by weak global demand. In the domestic debt market, Treasury Bill (T-Bill) cut-off yields declined across all tenors—3-month at 11.95%, 6-month at 11.92%, and 12-month at 11.95%. The government raised PKR 1,527 billion through T-Bills surpassing a target of 1,250 billion and PKR 427 billion via Pakistan Investment Bonds (PIBs), surpassing its PKR 350 billion target, including PKR 42 billion from 2-year, PKR 39 billion from 3-year, PKR 99 billion from 5-year and 248 billion from 10-year. Looking ahead, markets await the IMF Executive Board meeting on May 9, where Pakistan's Extended Fund Facility (EFF) tranche and climate financing are on the agenda. Despite external headwinds, including US-China tariffs and heightened regional tensions with India, Pakistan's strong remittance flows and a solid current account surplus provide cautious optimism as the country works to consolidate its economic recovery.

Stock Market Review

In April 2025, the PSX witnessed a turbulent month, with the KSE-100 Index closing at 111,327 points, reflecting a significant decline of 5.50% MoM down 6,480 points. The decline was primarily driven by escalating geopolitical tensions and cross-border unrest following the Pahalgam incident, in response to which, India accused Pakistan, suspended the Indus Water Treaty, closed its borders, and halted bilateral trade. Pakistan responded with similar measures. These developments significantly increased regional uncertainty and led to a net FIPI outflow of USD 9.51 Mn. Global sentiment was also rattled by the U.S. imposing widespread tariffs amid a growing trade conflict with China, putting further pressure on emerging markets. Despite the turbulence, Pakistan's economic data showed some resilience: a record current account surplus of USD 1.2 billion in March 2025, fueled by all-time high monthly remittances of USD 4.1 billion, and subdued inflation, with NCPI at 0.28% YoY in April. Domestically, the government announced significant relief in electricity tariffs—cutting PKR 7.41/unit for residential and PKR 7.69/unit for industrial users—and made progress toward resolving the PKR 1.3 trillion circular debt with banks. However, the hike in petroleum levy to PKR 70 per liter raised concerns over inflation and cost pressures. Additionally, weak corporate performance, reflected in a 2% YoY decline in KSE-100 Index earnings during 9MFY25, weighed on sentiment. Investors are now focused on the IMF Executive Board's upcoming meeting on May 9, which is expected to decide on the disbursement of the next tranche under the Extended Fund Facility (EFF), a critical factor for future market direction. In April 2025, the PSX experienced a volatile month, with the KSE-100 Index closing at 111,326.58 points marking a substantial MoM decline of 5.50%, or 6,480.17 points, despite a surge in trading activity as average daily value traded rose 26.00% MoM to USD 84.14 Million and volume increased 29.66% to 266.43 million shares. Foreign investors offloaded shares amounting to USD 9.51 million. On the domestic front, Insurance Companies and Brokers were net sellers of USD 45.10 million and USD 8.177 million, respectively. In contrast, NBFC and Companies were net buyers of USD 22.87 million and USD 16.41 million. A sector wise analysis shows that OMCs and Cements marked foreign inflows of USD 6.38 million and USD 3.26 million respectively. Whereas, Commercial Banks and Oil and Gas Exploration Companies resulted in foreign outflows of USD 8.50 million and USD 2.06 million respectively.

FUND MANAGER'S REPORT, April 2025

ECONOMY AND CAPITAL MARKETS UPDATE

Economic Review

Pakistan’s inflation rate dropped to a record low of 0.28% YoY in April 2025, down from 0.69% in March 2025 and 36.4% in April 2024 — one of the lowest monthly readings in six decades – bringing the average inflation for 10MFY25 to 4.73%, a dramatic improvement from 25.97% over the same period last year. Month-on-month, National CPI fell by 0.84%, with Urban CPI down 0.70% and Rural CPI contracting by 1.05%. This was largely driven by declines in food prices — notably perishable food items, which dropped 2.7% MoM and 26.7% YoY — as well as housing, water, electricity, gas, and fuels, which fell 2.3% MoM. On the external front, Pakistan’s trade deficit widened to \$2.18 billion in March 2025, reflecting domestic consumption of petroleum products and rising automobile sales. Exports totaled \$2.77 billion, while imports surged to \$4.95 billion. Cumulatively, exports for FY25 reached \$24.66 billion, with imports at \$43.39 billion, yielding a cumulative trade deficit of \$18.73 billion. Despite this, the external account strengthened significantly, lifted by record worker remittances of \$4.06 billion in March — the highest monthly inflow on record — largely fueled by Eid-related transfers and increased use of formal banking channels, as the interbank rate now closely matches open market rates, minimizing parallel market incentives. Consequently, the current account posted a robust \$1.2 billion surplus in March. As of April 30, 2025, Pakistan’s foreign exchange reserves stood at \$15.01 billion, comprising \$10.64 billion with the State Bank of Pakistan (SBP) and \$4.38 billion with commercial banks. On the fiscal side, the Federal Board of Revenue (FBR) collected Rs846 billion in April 2025, falling short of the Rs963 billion monthly target by Rs117 billion. However, cumulative collections for FY25 reached Rs9.299 trillion against a target of Rs10.130 trillion, marking a 27% increase over the Rs7.350 trillion collected in the same period last year. The exchange rate closed at 280.76/281.19 PKR per USD. With the US dollar depreciating against major global currencies (AUD, CHF, GBP, EUR, CAD), the rupee also saw corresponding slippages, reflecting its close peg to a weakening dollar. Looking ahead, markets await the IMF Executive Board meeting on May 9, where Pakistan’s Extended Fund Facility (EFF) tranche and climate financing are on the agenda. Despite external headwinds, including US-China tariffs and heightened regional tensions with India, Pakistan’s strong remittance flows and a solid current account surplus provide cautious optimism as the country works to consolidate its economic recovery.

Money Market Review

Headline inflation decelerated sharply in April 2025, with the Consumer Price Index (CPI) registering at 0.28% YoY—the lowest reading since September 2015. This marks a notable decline from 0.69% in March 2025 and a steep drop from 17.34% a year earlier, reflecting the combined impact of domestic policy measures, improved supply dynamics, and favorable global trends. Core inflation rose marginally on a monthly basis—1.3% in urban and 0.9% in rural areas—while annual urban and rural core inflation continued to ease to 7.4% and 9.0%, respectively. On the external front, SBP’s foreign exchange reserves currently stands at \$15.01 billion, comprising \$10.64 billion with the State Bank of Pakistan (SBP) and \$4.38 billion with commercial banks. The current account balance showed further improvement, posting a surplus of USD \$1.2 billion in March, up from USD 97 million deficit in the previous month. Cumulatively, the first nine months of FY25 registered a surplus of USD 1,859 million, supported by strong remittance inflows and export performance. Worker remittances reached \$4.05 billion in March 2025, with a nine-month total of \$28.1 billion, reflecting a 33% year-on-year increase, fueled by stable exchange rates and enhanced formal channels. Exports in March rise 8.6% year-on-year to \$3.5 billion, while the nine-month total reached \$30.9 billion, up 8.1% from \$28.6 billion last year, led by textiles but hampered by weak global demand. In April 2025, there was increasing market demand observed in the variable rate Ijarah Sukuk, with total participation reaching PKR 366 billion, significantly surpassing the target of PKR 30 billion. However, the Ministry ultimately raised only PKR 63 billion through these sukuk. On the other hand, the fixed rate Ijarah Sukuk saw total participation of PKR 35 billion, exceeding the target of PKR 30 billion. The Ministry secured PKR 9.6 billion in these fixed rate sukuk, spanning the 3-year, 5-year, and 10-year tenors.

Stock Market Review

In April 2025, the PSX witnessed a turbulent month, with the KMI-30 Index closing at 166,387.76 points, reflecting a significant decline of 9.13% MoM down 16,718.53 points. The decline was primarily driven by escalating geopolitical tensions and cross-border unrest following the Pahalgam incident, in response to which, India accused Pakistan, suspended the Indus Water Treaty, closed its borders, and halted bilateral trade. Pakistan responded with similar measures. These developments significantly increased regional uncertainty and led to a net FIPI outflow of USD 9.51 Mn. Global sentiment was also rattled by the U.S. imposing widespread tariffs amid a growing trade conflict with China, putting further pressure on emerging markets. Despite the turbulence, Pakistan’s economic data showed some resilience: a record current account surplus of USD 1.2 billion in March 2025, fueled by all-time high monthly remittances of USD 4.1 billion, and subdued inflation, with NCPI at 0.28% YoY in April. Domestically, the government announced significant relief in electricity tariffs—cutting PKR 7.41/unit for residential and PKR 7.69/unit for industrial users—and made progress toward resolving the PKR 1.3 trillion circular debt with banks. However, the hike in petroleum levy to PKR 70 per liter raised concerns over inflation and cost pressures. Additionally, weak corporate performance, reflected in a 2% YoY decline in KSE-100 Index earnings during 9MFY25, weighed on sentiment. Investors are now focused on the IMF Executive Board’s upcoming meeting on May 9, which is expected to decide on the disbursement of the next tranche under the Extended Fund Facility (EFF), a critical factor for future market direction. In April 2025, the PSX witnessed a turbulent month, with the KMI-30 Index closing at 166,387.76 points, reflecting a significant decline of 9.13% MoM down 16,718.53 points, despite a surge in trading activity as average daily value traded rose 8.08% MoM to USD 60.53 Million and volume increased 13.93% to 139.88 million shares. Foreign investors offloaded shares amounting to USD 9.51 million. On the domestic front, Insurance Companies and Brokers were net sellers of USD 45.10 million and USD 8.17 million, respectively. In contrast, NBFC and Companies were net buyers of USD 22.87 million and USD 16.41 million. IN FOCUS

FUND MANAGERS' REPORT April 2025

ABL
Stock Fund

INVESTMENT OBJECTIVE

To provide higher risk adjusted returns over the long term by investing in a diversified portfolio of equity instruments offering capital gain and dividends.

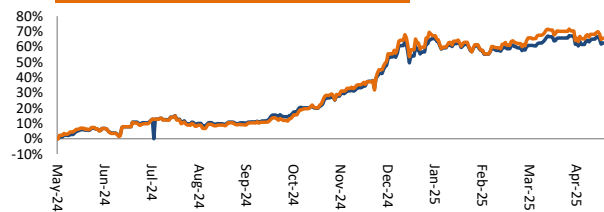

FUND MANAGER'S COMMENTS

ABL-SF decreased by 7.21% in April'25 against 5.50% decrease in the benchmark, reflecting an underperformance of 171 basis points. In April 2025, the PSX witnessed a turbulent month, with the KSE-100 Index closing at 111,327 points, reflecting a significant decline of 5.50% MoM down 6,480 points. The decline was primarily driven by escalating geopolitical tensions and cross-border unrest following the Pahalgam incident, in response to which, India accused Pakistan, suspended the Indus Water Treaty, closed its borders, and halted bilateral trade. Pakistan responded with similar measures. These developments significantly increased regional uncertainty and led to a net FIPI outflow of USD 9.51 Mn. Global sentiment was also rattled by the U.S. imposing widespread tariffs amid a growing trade conflict with China, putting further pressure on emerging markets. Despite the turbulence, Pakistan's economic data showed some resilience: a record current account surplus of USD 1.2 billion in March 2025, fueled by all-time high monthly remittances of USD 4.1 billion, and subdued inflation, with NCPI at 0.28% YoY in April. Domestically, the government announced significant relief in electricity tariffs—cutting PKR 7.41/unit for residential and PKR 7.69/unit for industrial users—and made progress toward resolving the PKR 1.3 trillion circular debt with banks. However, the hike in petroleum levy to PKR 70 per liter raised concerns over inflation and cost pressures. Additionally, weak corporate performance, reflected in a 2% YoY decline in KSE-100 Index earnings during 9MFY25, weighed on sentiment. Investors are now focused on the IMF Executive Board's upcoming meeting on May 9, which is expected to decide on the disbursement of the next tranche under the Extended Fund Facility (EFF), a critical factor for future market direction. In April 2025, the PSX experienced a volatile month, with the KSE-100 Index closing at 111,326.58 points marking a substantial MoM decline of 5.50%, or 6,480.17 points, despite a surge in trading activity as average daily value traded rose 26.07% MoM to USD 84.14 Million and volume increased 29.66% to 266.43 million shares. Foreign investors offloaded shares amounting to USD 9.51 million. On the domestic front, Insurance Companies and Brokers were net sellers of USD 45.10 million and USD 8.177 million, respectively. In contrast, NBFC and Companies were net buyers of USD 22.87 million and USD 16.41 million. A sector wise analysis shows that OMCs and Cements marked foreign inflows of USD 6.38 million and USD 3.26 million respectively. Whereas, Commercial Banks and Oil and Gas Exploration Companies resulted in foreign outflows of USD 8.50 million and USD 2.06 million respectively.

INVESTMENT OBJECTIVE

To provide capital appreciation to investors through higher, long term risk adjusted returns by investing in a diversified shariah compliant portfolio of equity instruments offering capital gains and dividends.

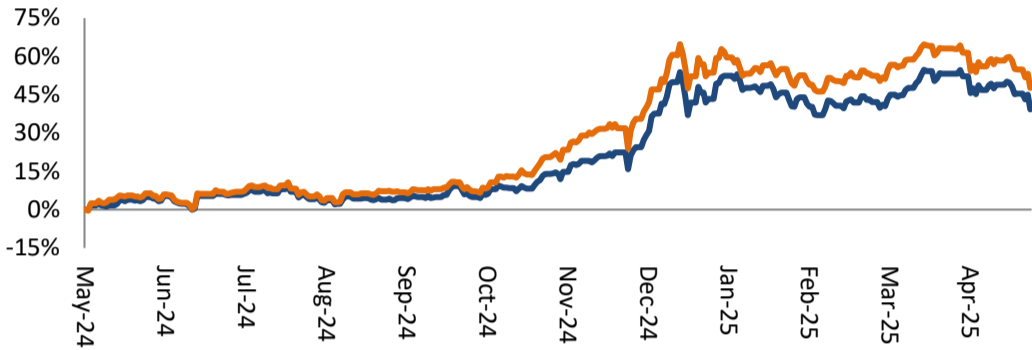

FUND MANAGER'S COMMENTS

ABL-ISF decreased by 9.39% in April '25 against 9.13% decrease in the benchmark, reflecting an underperformance of 26 basis points. As at April 30th , ABL-ISF was 88.60% invested in equities and remaining in bank deposits. In April 2025, the PSX witnessed a turbulent month, with the KMI-30 Index closing at 166,387.76 points, reflecting a significant decline of 9.13% MoM down 16,718.53 points. The decline was primarily driven by escalating geopolitical tensions and cross-border unrest following the Pahalgam incident, in response to which, India accused Pakistan, suspended the Indus Water Treaty, closed its borders, and halted bilateral trade. Pakistan responded with similar measures. These developments significantly increased regional uncertainty and led to a net FIPI outflow of USD 9.51 Mn. Global sentiment was also rattled by the U.S. imposing widespread tariffs amid a growing trade conflict with China, putting further pressure on emerging markets. Despite the turbulence, Pakistan’s economic data showed some resilience: a record current account surplus of USD 1.2 billion in March 2025, fueled by all-time high monthly remittances of USD 4.1 billion, and subdued inflation, with NCPI at 0.28% YoY in April. Domestically, the government announced significant relief in electricity tariffs—cutting PKR 7.41/unit for residential and PKR 7.69/unit for industrial users—and made progress toward resolving the PKR 1.3 trillion circular debt with banks. However, the hike in petroleum levy to PKR 70 per liter raised concerns over inflation and cost pressures. Additionally, weak corporate performance, reflected in a 2% YoY decline in KSE-100 Index earnings during 9MFY25, weighed on sentiment. Investors are now focused on the IMF Executive Board’s upcoming meeting on May 9, which is expected to decide on the disbursement of the next tranche under the Extended Fund Facility (EFF), a critical factor for future market direction. Foreign investors offloaded shares amounting to USD 9.51 million. On the domestic front, Insurance Companies and Brokers were net sellers of USD 45.10 million and USD 8.17 million, respectively. In contrast, NBFC and Companies were net buyers of USD 22.87 million and USD 16.41 million. A sector wise analysis shows that OMCs and Cements marked foreign inflows of USD 6.38 million and USD 3.26 million respectively. Whereas, Commercial Banks and Oil and Gas Exploration Companies resulted in foreign outflows of USD 8.50 million and USD 2.06 million respectively.

FUND MANAGER'S COMMENTS

ABL Pension Fund - Debt Sub Fund posted an annualized yield of 10.51% during the month of April '25. At month end, Cash at bank, Investment in Corporate TFC / Sukuks, T-bills and PIBs stood at 4.59%, 3.28%, 58.66% and 32.47% respectively.

ABL Pension Fund - Money Market Sub Fund generated an annualized return of 9.85% in April '25. At month end portfolio comprised of 4.37% in Cash, T-bills stood at 95.56% and PIBs stood at 0.00%.

ABL Pension Fund - Equity Sub Fund generated a return of -7.31% during the month of April '25. In April 2025, the Pakistan stock market witnessed a turbulent month, with the KSE-100 Index closing at 111,327 points, reflecting a significant decline of 5.50% MoM down 6,480 points. The decline was primarily driven by escalating geopolitical tensions and cross-border unrest following the Pahalgam incident, in response to which, India accused Pakistan, suspended the Indus Water Treaty, closed its borders, and halted bilateral trade. Pakistan responded with similar measures. These developments significantly increased regional uncertainty and led to a net FPII outflow of USD 9.51 Mn. Global sentiment was also rattled by the U.S. imposing widespread tariffs amid a growing trade conflict with China, putting further pressure on emerging markets. Despite the turbulence, Pakistan's economic data showed some resilience: a record current account surplus of USD 1.2 billion in March 2025, fueled by all-time high monthly remittances of USD 4.1 billion, and subdued inflation, with NCPI at 0.7% YoY in March and further market expectation of easing below 0.5% in April. Domestically, the government announced significant relief in electricity tariffs—cutting PKR 7.41/unit for residential and PKR 7.69/unit for industrial users—and made progress toward resolving the PKR 1.3 trillion circular debt with banks. However, the hike in petroleum levy to PKR 70 per liter raised concerns over inflation and cost pressures. Additionally, weak corporate performance, reflected in a 2% YoY decline in KSE-100 Index earnings during 9MFY25, weighed on sentiment. Investors are now focused on the IMF Executive Board's upcoming meeting on May 9, which is expected to decide on the disbursement of the next tranche under the Extended Fund Facility (EFF), a critical factor for future market direction. In April 2025, the Pakistan stock market witnessed a turbulent month, with the KSE-100 Index closing at 111,327 points, reflecting a significant decline of 5.50% MoM down 6,480.17 points, despite a surge in trading activity as average daily value traded rose 26.07% MoM to USD 84.14 Million and volume increased 29.66% to 266.43 million shares. Foreign investors offloaded shares amounting to USD 9.51 million. On the domestic front, Insurance Companies and Brokers were net sellers of USD 45.10 million and USD 8.177 million, respectively. In contrast, NBFC and Companies were net buyers of USD 22.87 million and USD 16.41 million. A sector wise analysis shows that OMCs and Cements marked foreign inflows of USD 6.38 million and USD 3.26 million respectively. Whereas, Commercial Banks and Oil and Gas Exploration Companies resulted in foreign outflows of USD 8.50 million and USD 2.06 million respectively.
